Extraordinary Announcement of 4iG Plc.

on concluding a non-binding memorandum of understanding

4iG Public Limited Company ("**4iG**") hereby informs the participants of the capital market that 4iG and Sentinel Midstream LLC ("**Sentinel**") a company incorporated in the United States, have today signed a non-binding memorandum of understanding to jointly develop critical energy infrastructure in the Adriatic region.

The cooperation aims to identify joint investment and project development opportunities in the Adriatic region that would facilitate the storage, transportation and use of U.S. liquefied natural gas (LNG) and other liquid hydrocarbons for energy production, as well as the development of related energy infrastructure.

The partnership could open up new supply routes and sources, improve the diversity and predictability of energy supply in the region, and make a significant contribution to energy security in Central and Eastern Europe and the Western Balkans. The memorandum of understanding is closely aligned with 4iG's energy strategy, which aims to acquire operational energy generation assets, develop new capacity and introduce next-generation energy technologies and infrastructure across the region.

The signing of the memorandum of understanding adds a U.S. industry partner to the international network of 4iG Group's new strategic business division, announced in August, and extends the Group's transatlantic cooperation in critical infrastructure to the energy sector.
