Budapest, 25 March 2026.

## **Montenegro selects 4iG Group to implement digitalization development projects**

- **The Government of Montenegro selected 4iG Group for projects with the objective of developing technology used by law enforcement agencies and establishing a data centre with related infrastructure.**
- **The investment marks 4iG Group's first large-scale international government contract in digital infrastructure development.**
- **The decision, which was made within the framework of the national cooperation agreement signed between Hungary and Montenegro on July 1, 2025, represents significant international recognition of 4iG Group's capabilities, as well as the growing regional importance of the Hungarian technology and ICT sector.**
- **The developments to be implemented as part of the Montenegrin government's investment project include deployment and integration of IT and telecommunications systems, the procurement of equipment, as well as installation, training, support, and operational services.**
- **The total budget allocated for the advancing law enforcement technology project exceeds EUR 54.2 million.**
- **The development of the data centre with related infrastructure is currently in the preparatory phase, the final budget will be determined by the implementation working group.**

The Government of Montenegro selected 4iG Group from Hungarian companies to implement ICT projects aimed at technological development of law enforcement, besides of establishing a data centre with related infrastructure. The decision recognizes 4iG Group's international system integration experience and technological expertise, and marks a milestone in the company's history, as it represents the first time 4iG can deliver large-scale technology development and provide integrated solutions for a foreign government client.

The projects are being implemented under the intergovernmental cooperation agreement signed by Hungary and Montenegro on July 1, 2025. The agreement aims to prepare and execute joint technological developments, while also strengthens the participation of Hungarian companies in digital infrastructure development programs of Montenegro.

The law enforcement development programme and the related system integration will be implemented by 4iG Group's subsidiary, 4iG Informatika Zrt. (4iG IT), including the delivery and installation of equipment, necessary training, and ongoing expert support. The budget allocated for the IT investment is EUR 54.25 million. The data centre and related infrastructure development project will be carried out by 4iG International Digital Infrastructure Zrt. (4iG IDI), which will design and operate the TIER III-certified state data centre. Following the establishment of a working group to support the project's implementation, professional consultations will begin to define the investment's costs and financing options.

The investments currently in preparation will contribute to strengthening the international presence of Hungarian technology and system integration expertise, while reinforcing 4iG Group's position among the region's leading technology service providers.

4iG Group has been present in Montenegro since 2021, where its subsidiary, One Montenegro, is one of the country's leading mobile service providers. As a strategic partner of the Montenegrin government, 4iG Group has implemented significant network developments in recent years, participates in the rollout of 5G infrastructure, and plays an active role in developing the digital ecosystem and introducing innovative technologies.
